		MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
Russel	What did you do yesterday?	Created a Sitemap.	Acquired knowledge on wireframes.	Understood wireframes and how to make them.	Made a low fidelity wireframe sketch	Finalizes the wireframe.
	What will you work on today?	Research about wireframes.	Research about how to create wireframes and what kind to do.	Make a sketch of a low-fidelity wireframe	Use an application to visualize it to create a Mid-fidelity wireframe.	Check if the wireframes and sitemap for mistakes.
	Do you have any obstacles?	None.	None.	None.	None.	None.

## SPRINT REVIEW

### SPRINT GOALS

The goal for this sprint is to determine the product and sprint backlogs that will help establish the next sprint. In this first sprint, the objective is to realize and learn what website to create. After that, create a sitemap to help visualize what the website would encompass then wireframes for easier imagery of the website, as a preparatory step in creating our desired goal.

### PRODUCT OVERVIEW

The concept of the product is a Wikipedia-like website wherein reliable and credible information about The Big Bang Theory Series is presented. For example, the character descriptions, seasons, and any related content. It is also envisioned to have a forum to create a platform of discourse, for the fans and onlookers alike.

### STATUS OVERVIEW

At the end of this sprint, a sitemap has already been created and wireframe for our website. The sprint backlog was also established, which will serve as a guide in our future sprints.

### IMPEDIMENTS

So far, there are no impediments that might hinder the progress of our product (website) or might make it stray away from the Sprint Goal.

### FEEDBACK

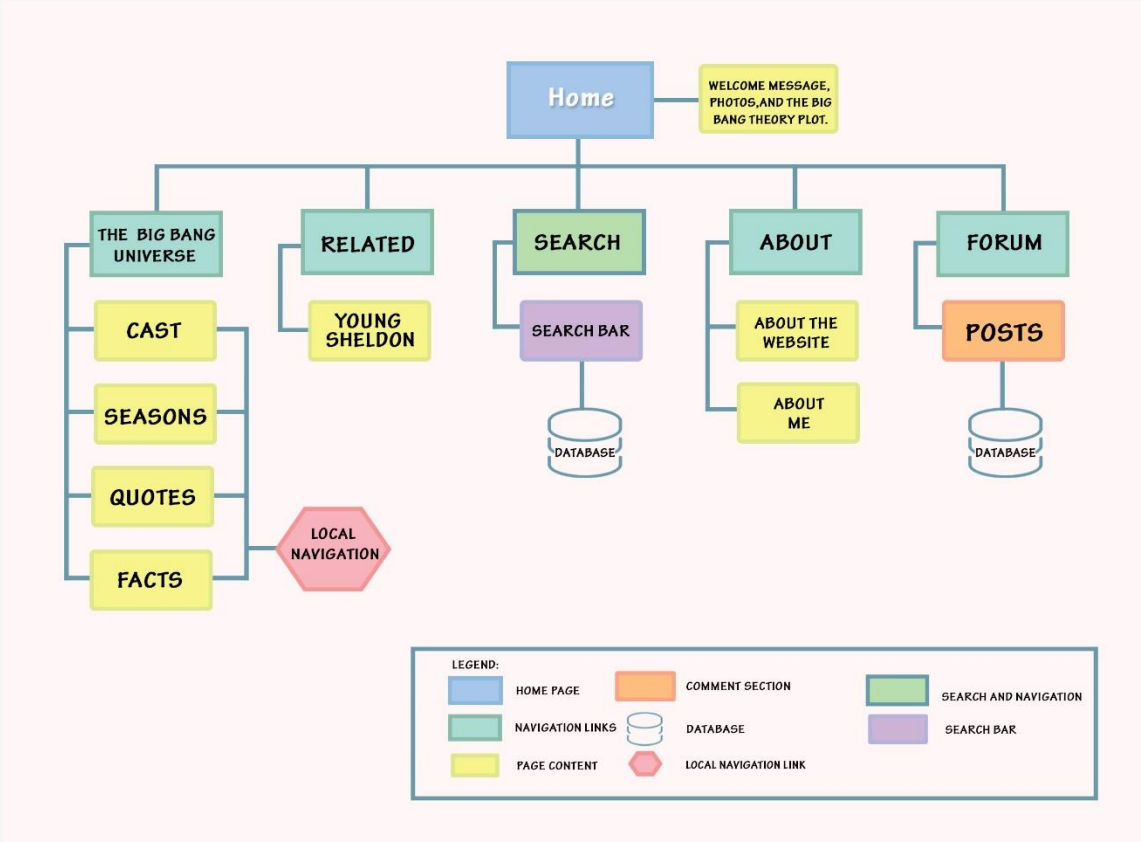

As much as the design of the sitemap and the wireframes are concerned, there are no negative reactions to this point and the time has been managed well helping the developer in finishing on time.

## INCREMENT

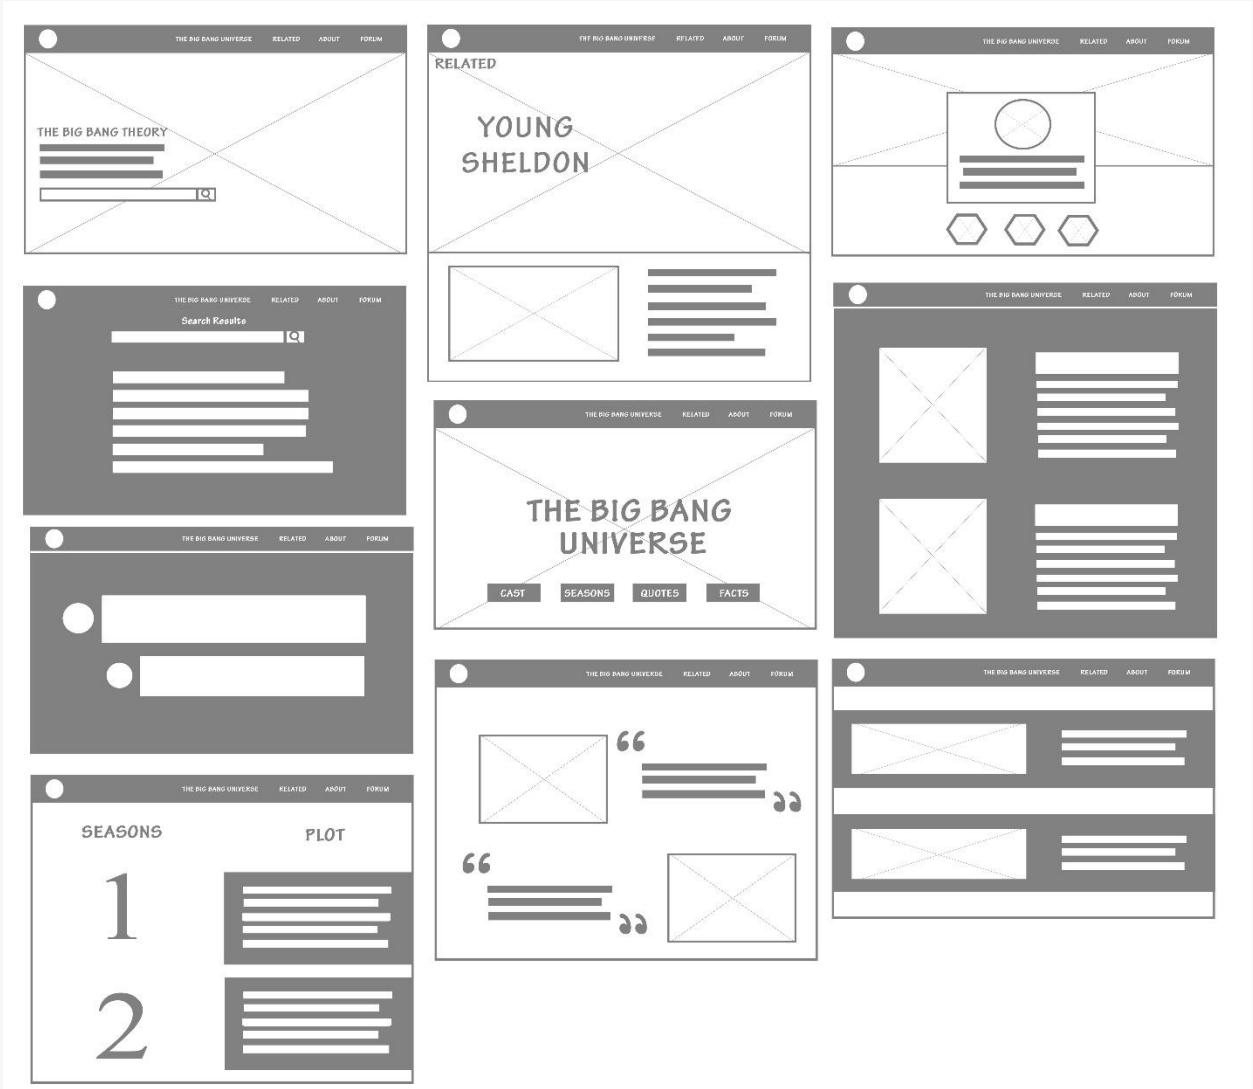

### SCRUM TEAM'S DEFINITION OF DONE IN THIS SPRINT

The increment is done if the Sprint Backlog's user stories has been realized and was created on time, making it a preliminary step as a springboard and guide for future sprints.

SITEMAP [DONE]

WIREFRAMES [DONE]

SPRINT RETROSPECTIVE

WHAT WENT WELL

The research on Scrum was fruitful.

The user stories were in line with the Sprint Goal.

Time were used meaningfully with the help of Daily Scrum.

The sitemap for the website was done with consideration to the Sprint Goal.

The wireframes were creatively made.

The use of Fibonacci sequence as an estimation to Story Points is a good way for time approximation.

WHAT TO IMPROVE

Allocate more time to work.

User Stories should be chosen more in line with the sprint goal.

Assign more time in the sprint backlog when doing layouts.

Remember to choose the more important User stories to put in the sprint backlog.

ACTIONS TO TAKE

Eliminate unnecessary things in Daily Scrum.

Guarantee to have breaks in between to be more productive.
